How are the team sales calculated

Balance

To achieve new statuses, you need team sales. **When calculating team sales, one branch of your team cannot have a volume that is bigger than the sales of all other branches. This is the balance rule.**

The actual sales of the team are **10,000 USDT**. The volume of the least branches is **5,000 USDT**, the calculated volume of the dominant branch is also **5,000 USDT**.
The team sales for the status are **5,000 + 5,000 = 10,000 USDT**. The disbalance is **0 USDT**.

Try to develop the branches of your team evenly

How are the team sales calculated

Disbalance

The actual sales of the team are **9,000 USDT**.

The volume of the least branches is **4,000 USDT**, the calculated volume of the dominant branch is also **4,000 USDT**.

The team sales for the status are **4,000 + 4,000 = 8,000 USDT**. The disbalance is **1,000 USDT**.

Actual sales: **9,000 USDT**

Team status sales: **8,000 USDT**

Disbalance: **1,000 USDT**

Try to develop the branches of your team evenly

How to use the **disbalance rule?**

**The sum of disbalance is never cleared!
This volume will be taken into account for the status as
soon as the lowest branches of your team develop!**

**To make your work effective, you need to create
a wide first line**
